

Christopher M. Klein

Software Engineer • Founder & President

Nassau, The Bahamas · cmklein.com

Professional Summary

Software engineer working across banking systems, backend development, and automation. Experienced in .NET, Python, SQL Server, and cloud infrastructure. Founder and President of Caynetic Ltd., building Caribbean-focused applications, AI integrations, and open-source tools.

Professional Experience

Software Engineer

International Private Banking Systems (IPBS)

Nassau, Bahamas | 2022 - Present

- Maintain and enhance a client's e-banking portal and develop core banking features.
- Build banking APIs using ASP.NET Core, C#, VB.NET, and SQL Server.
- Implement API authentication, access controls, and transaction validation.
- Developed a card-preauthorization reversal workflow with manager authorization, rollback, and audit logging.
- Modernized financial reporting with client-accepted Excel and CSV exports.
- Stabilize legacy applications and prepare security improvements for review.
- Verify changes through automated tests, isolated database checks, and release rehearsals.

Founder & President

Caynetic Ltd.

Nassau, Bahamas | 2025 - Present

- Lead client software projects and develop Caribbean-focused applications, automation systems, and open-source tools.
- Build backend services with Python, Django, Flask, PostgreSQL, and Redis.
- Integrate AI APIs and messaging workflows with structured outputs and validation.
- Manage Linux infrastructure and deployments across DigitalOcean and Cloudflare.

Software Engineer / Consultant

Independent

Nassau, Bahamas | 2023 - 2025

- Built OCR-assisted extraction and automated document-generation workflows.
- Developed scripts for data cleanup, validation, and operational automation.

Selected Projects

CayneticVPN - VPN platform

Develop application and infrastructure components spanning a Django website, Flask control plane, and Flutter client.

CayVPN - Open-source VPN management

Develop and maintain an MIT-licensed Ubuntu application for VPN configuration, routing, monitoring, backups, and recovery.
